| | | ✓ | ✓ | €0.00 |

CONFIDENTIAL

| | | | | | |
|---|---|---|---|---|---|
| | | Radar-based driver assistance system consisting of:<br>Lane Change Warning, rear crossing traffic warning with brake intervention, exit warning, Rear Collision Prevention<br><br>- Lane Change Warning with active return permanently monitors the zones to each side of the vehicle, detects vehicles in the "blind spot" from 20 km/h and faster when intending to change lanes (turn indicator is activated or stalk is held in 'short on' position), haptic warning via the steering wheel (vibration) and flashing symbol in the exterior mirror as well as return to the lane via active steering intervention. Warnings can be issued when turning (e.g. U-turn) in the low speed range up to approx. 20 km/h.<br><br>- Rear crossing traffic warning:<br>Supports the driver, for example, when reversing out of parking spaces and brakes to avoid potential collisions with intersecting traffic in situations where it is difficult to see everything around them. The Reversing Assist Camera extends the rear crossing traffic warning by an additional real-image display.<br><br>- Rear collision prevention:<br>detects the threat of rear collisions via rear sensors and warns the traffic behind via the hazard warning lights (flashing in double frequency). Preventive measures will also be taken in unavoidable accident situations (e.g. belt tensioning, closing windows, etc.).<br><br>- Exit warning: detects approaching objects (vehicles, cyclists) and warns the driver and/or passengers (exterior mirror, ambient lighting, sounds) when opening doors if there is a risk of collision with the detected object.<br><br>Please note: system contents included in the optional equipment only provide assistance within defined system limits. It remains the responsibility of the driver to react to the actual traffic situation.<br>Note: refer to the country-specific offer | ● | ● | |
| | | If not with S5ASA include S5ASA | ● | ● | |
| S5ATA | **Driving Assistant Plus** | | □ | □ | |
| | | | ✓ | ✓ | €272.28 |
| | | Camera and radar-based driver assistance system consisting of:<br><br>Active Cruise Control, Steering and Lane Control Assistant, Speed Limit Info, Automatic Speed Limit Assistant<br><br>- Active Cruise Control: maintains a variable distance to the vehicle in front; in addition to the vehicles driving ahead, vehicles at standstill can also be detected. The vehicle then undergoes automatic initial braking, braking up to standstill if necessary (Stop&Go). The system offers controlled start-up from a standstill, either automatically or initiated by the driver. If requested, the system can adapt the distance according to the situation (e.g. if weather conditions change) so the driver does not need to take action. Possible set speed for Cruise Control in the range of approx. 30 - 180 km, operation of active Cruise Control via multifunction controls for steering wheel.<br><br>- Steering and Lane Control Assistant (basic): helps with tracking using corrective, cooperative steering in the speed range 0–180 km/h, thus extending the functionality of Active Cruise Control.<br><br>- Speed Limit Info (SLI) with display of speed limits further ahead and no-overtaking indicator as well as manual Speed Limit Assist which enables the adoption of a detected speed limit as a set speed for the Distance Control (ACC with Stop&Go) and Speed Limiter function as well as Cruise Control.<br><br>- Automatic Speed Limit Assist (SLA): SLA combines SLI with Active Cruise Control. It enables the automated, anticipatory adoption of a detected speed limit into the Distance Control (ACC with Stop&Go).<br><br>Note: refer to the country-specific offer | ● | ● | |
