Independent Authority  
for Public Revenue (IAPR)

Athens, June 23, 2021

## **PRESS RELEASE**

### **Digital pre-registration in One Stop Shop (VAT OSS) for e-commerce**

The Independent Authority for Public Revenue (IAPR) has created the VAT One Stop Shop Service (VAT OSS), a digital platform for businesses choosing to use the new EU VAT rules on imports and intra-Union retail transactions (B2C) via e-commerce.

The digital VAT OSS Service enables businesses -services and goods suppliers- to register for VAT purposes in a single Member State of the EU, where they also pay the VAT for other Member States as well as VAT on importations from third countries for consignments up to EUR 150.

Starting today, businesses choosing to use the new EU VAT framework for e-commerce, as soon as it is transposed into Greek law, can pre-register through the [oss.aade.gov.gr](https://oss.aade.gov.gr) platform.

Following the transposition of the new VAT rules for e-commerce into Greek law, the digital VAT OSS Service will be fully operational, with the gradual addition of a series of options to further support businesses in the e-commerce sector.
