## **PRESS RELEASE**

### **IAPR: New version of the appodixi application**

The new version of the “appodixi” app is now available on Google Play and on Apple Store.

The new version includes adjustments so that the application:

- is available on mobile devices running iOS 17.1
- recognises the QR Code of Online Tax Mechanisms that have been upgraded, now including the document’s date and time of issue (Decision 1173/2022).

Mobile devices that already have the appodixi app are updated through the automatic update mechanism, which prompts the end user to update the app.

In particular for users of the application running on iOS 17.1, it is pointed out that they must first uninstall the previous version of the application and then download the new version from Apple Store.
