## **PRESS RELEASE**

### **IAPR: The digital applications for obtaining a TIN and/or Authentication Key are also available in English**

To better serve non-Greek speaking taxpayers, the Independent Authority for Public Revenue deploys the English versions of the digital applications for the obtainment of:

- TIN and Authentication Key, for simultaneous provision of TIN and Authentication Key by individuals and
- Authentication Key, for the provision of authentication key to both individuals and legal persons and entities who already have a TIN and wish to register/reregister in IAPR's digital services.

With the English versions of the applications, IAPR continues working on the simplification of the procedures aimed at:

- expatriates,
- residents abroad,
- non-Greek speaking residents of the country and
- foreign businesses,

being an effective tool that optimizes service and further promotes tax compliance.

“Today, we are taking another important step in facilitating citizens and businesses. Our expatriates, as well as non-Greek speaking taxpayers, can now be effectively served for the granting of a TIN and an Authentication key, so that they can gain access to all the digital services of IAPR and the Greek public sector”, stated the Governor of IAPR, Giorgos Pitsilis.

For further clarifications, those interested can contact the Taxpayer Service Center of IAPR, at (+30) 213 162 1000, on the weekdays, from 07:30 to 17:00.
