6.5 Driver assistance					
S5ASA	Driving Assistant	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
		✓	✓	✓	€0.00

	<p>Radar-based driver assistance system consisting of: Lane Change Warning, rear crossing traffic warning with brake intervention, exit warning, Rear Collision Prevention</p> <p>- Lane Change Warning with active return permanently monitors the zones to each side of the vehicle, detects vehicles in the "blind spot" from 20 km/h and faster when intending to change lanes (turn indicator is activated or stalk is held in 'short on' position), haptic warning via the steering wheel (vibration) and flashing symbol in the exterior mirror as well as return to the lane via active steering intervention. Warnings can be issued when turning (e.g. U-turn) in the low speed range up to approx. 20 km/h.</p> <p>- Rear crossing traffic warning: Supports the driver, for example, when reversing out of parking spaces and brakes to avoid potential collisions with intersecting traffic in situations where it is difficult to see everything around them. The Reversing Assist Camera extends the rear crossing traffic warning by an additional real-image display.</p> <p>- Rear collision prevention: detects the threat of rear collisions via rear sensors and warns the traffic behind via the hazard warning lights (flashing in double frequency). Preventive measures will also be taken in unavoidable accident situations (e.g. belt tensioning, closing windows, etc.).</p> <p>- Exit warning: detects approaching objects (vehicles, cyclists) and warns the driver and/or passengers (exterior mirror, ambient lighting, sounds) when opening doors if there is a risk of collision with the detected object.</p> <p>Please note: system contents included in the optional equipment only provide assistance within defined system limits. It remains the responsibility of the driver to react to the actual traffic situation. Note: refer to the country-specific offer</p>	•	•	•	
S5ATA	Driving Assistant Plus	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		✓	✓	✓	€0.00
	Camera and radar-based driver assistance system consisting of:				
	Active Cruise Control, Steering and Lane Control Assistant, Speed Limit Info, Automatic Speed Limit Assistant				
	<p>- Active Cruise Control: maintains a variable distance to the vehicle in front; in addition to the vehicles driving ahead, vehicles at standstill can also be detected. The vehicle then undergoes automatic initial braking, braking up to standstill if necessary (Stop&Go). The system offers controlled start-up from a standstill, either automatically or initiated by the driver. If requested, the system can adapt the distance according to the situation (e.g. if weather conditions change) so the driver does not need to take action. Possible set speed for Cruise Control in the range of approx. 30 - 180 km, operation of active Cruise Control via multifunction controls for steering wheel.</p> <p>- Steering and Lane Control Assistant (basic): helps with tracking using corrective, cooperative steering in the speed range 0–180 km/h, thus extending the functionality of Active Cruise Control.</p> <p>- Speed Limit Info (SLI) with display of speed limits further ahead and no-overtaking indicator as well as manual Speed Limit Assist which enables the adoption of a detected speed limit as a set speed for the Distance Control (ACC with Stop&Go) and Speed Limiter function as well as Cruise Control.</p> <p>- Automatic Speed Limit Assist (SLA): SLA combines SLI with Active Cruise Control. It enables the automated, anticipatory adoption of a detected speed limit into the Distance Control (ACC with Stop&Go).</p>	•	•	•	
	Only with P7YHA	•	•	•

		Includes 2 functions: "MINI Digital Key Plus" - Smartphone or smartwatch as a vehicle key - Unlocking the vehicle when approaching it, locking the vehicle when moving away from it (requires UWB-enabled mobile device). If the device is not UWB-enabled, the customer must hold it to the outside door handle to unlock the vehicle and place it in the smartphone tray to start the engine. - Lighting effects when approaching the vehicle or moving away from it. If the Digital Key has been linked to the MINI ID, the profile of the person approaching the vehicle is loaded additionally, and the vehicle is personalised accordingly (e.g. seat adjustment) (lighting effects require a UWB-enabled smartphone). - The vehicle owner can set up the main digital key for 1 smartphone and 1 smartwatch - The vehicle owner can invite up to 5 friends; 1 smartphone and 1 smartwatch can be activated as a vehicle key for each friend - When sharing a digital key, vehicle functions may be restricted. The recipient of this Digital Key will only be able to drive at up to 140 km/h, will not have the full acceleration power available, and will not be able to turn the radio up to full volume, or switch off DSC - Refer to the SMW/the FAQ page for compatible smartphones and further details: https://to.bmw/digitalkey-devices - Includes the MINI Digital Key Service Card (NFC card the size of a credit card), which can be activated as necessary via the smartphone tray and will be stored in the glove compartment in deactivated state upon delivery. Convenient access for physical vehicle key - Unlocking when approaching the vehicle, locking when moving away from it - Lighting effects and personalisation as described above All details on "Digital Products and Services" can be found in the SALES & MARKETING WORKPLACE using the following link: https://smw.bmwgroup.net/group/smw/bmw- Only with P7YEA / P7YFA / P7YGA / P7YHA	●	●	●
